Invenra Inc. Announces a Strategic Collaboration with Catalent to Co-Discover Novel Bispecific ADCs

Madison, WI – April 2, 2024 – Invenra Inc., an innovative leader in bispecific antibody technology, is pleased to announce a strategic collaboration with Catalent, a global Contract Development and Manufacturing Organization (CDMO) specializing in innovative drug development solutions. The collaboration will harness the combined expertise and proprietary technologies of Invenra and Catalent to co-discover novel bispecific antibody-drug conjugates.

Dr. Roland Green, CEO of Invenra, remarks, “We are excited to collaborate with the innovative team at Catalent’s Redwood Bioscience subsidiary. We believe that the combination of Invenra’s B-Body bispecific antibody platform with Catalent’s SMARTag® ADC expertise has the potential to unlock synergies and accelerate the development of next-generation cancer therapeutics.”

Both companies share a commitment to developing novel therapeutic solutions with the potential to make a meaningful impact in the lives of patients.
